

## Biocide

EPA Reg. No. 74602-3-44786

**AAV-08**

**CHEMTEX**  
INTERNATIONAL CHEMTEX CORPORATION

*“An ISO Certified Company”*

## Industrial Microbiocide

- Broad spectrum of activity
- Effective over wide pH range with no loss of efficacy
- Does not form chlorinated organic compounds
- No possibility of resistance

Chemtex AAV-08 is a high performance liquid oxidizing microbiocide that is very effective at controlling the growth of algae, bacteria and fungi in open and closed recirculating cooling systems.

It is also effective at penetrating and removing biomasses.

### DOSAGE

Initial dosage rate is 3 - 5 ppm as ClO<sub>2</sub>. Continuing dosage levels of AAV-08 will vary with water quality and severity of problem.

Consult your authorized Chemtex representative for proper dosage and control requirements.

### FEEDING

Chemtex AAV-08 can be fed on a slug basis or continuously to the tower basin, a recirculating water line or other feed point that allows adequate mixing and uniform product distribution. The feed point should be well below the water line to prevent volatilization of ClO<sub>2</sub> to the atmosphere. For closed recirculating systems, AAV-08 should be slug fed using a by-pass feeder.

### PRODUCT DATA

<b>FORM:</b>	Liquid
<b>pH:</b>	11.8
<b>SPECIFIC GRAVITY:</b>	1.056

### HANDLING

Harmful if swallowed. Avoid contact with skin, eyes or clothing. If swallowed, drink promptly a large quantity of water. Do not induce vomiting. In case of eye contact, flush eyes with large volumes of water for 15 minutes. Get medical attention. If skin contact occurs, wash with plenty of soap and water. Get medical attention if irritation persists.

### PACKAGING

55 Gallon Drum - 30 Gallon Drum - 5 Gallon Pail
