

## COOLING WATER TREATMENT

### 1500

#### BIOFILM CLEANING AGENT

##### Application

Bond 1500 is a highly effective cooling system biofilm cleaning agent. It is particularly effective at penetrating and removing algal biofilms. 1500 can be used as an adjunct to maintain cooling systems free of algae growth.

##### Advantages

Highly efficient penetrant  
Powerful biofilm cleaner  
Effective against algae

##### Dosage

Dosage levels for 1500 will depend upon the severity of the problem. Contact your bond Representative for specific dosage requirements.

##### Feeding

1500 should be slug fed to a point of rapid circulation. 1500 should not be fed in conjunction with glutaraldehyde based biocides. It is compatible with all other Bond biocides and scale and corrosion inhibitors.

##### Product Data

FORM:	Liquid
